COMMISSIONER OF PATENTS

Washington, D.C. 20231

AMENDMENT AND RESPONSE

Sir:

In response to the Office Action dated March 27, 2002 please amend the aboveidentified application as follows:

IN THE CLAIMS

Please amend claims 1, 7 and 10 to read as follows:

(Amended) A hollow piston used in a compressor, wherein the piston has an end wall that receives the pressure of a cylinder bore of the compressor, the end wall having a substantially flat outer end face that is exposed to the pressure of the cylinder bore and an inner end face that is opposite to the outer and face, wherein the contour of the inner end face, from the radially outside portion toward the radially inside portion, first approaches the outer end face and then departs from the outer end face to reinforce the strength of the end wall against the pressure applied to the outer end face.
